Vaishnavi Sarode

sarodevaishnavi2003@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Data Analyst with hands-on experience in Excel, SQL, Python and Power BI, skilled at cleaning raw data, writing analytical queries and turning findings into clear business insights. Built interactive Power BI dashboards using DAX measures and KPI cards to track sales performance. Completed a Data Analytics internship covering data cleaning, visualisation and reporting. Comfortable presenting findings through dashboards, charts and analytical reports.

Experience

Data Analyst Intern – Digital Den Aug 2025 – Jan 2026

- Implemented data analysis workflows using Excel, SQL, Python, and Power BI to clean, transform, analyze, and visualize data for business reporting and decision-making.
- Solved data-related problems by performing exploratory analysis, identifying trends and performance gaps, developing KPIs, and converting raw datasets into actionable business insights.
- Gained practical experience in data cleaning, analytical thinking, dashboard development, business problem-solving, and communicating data-driven insights to support decision-making.

Projects

Myntra Sales & Customer Analytics – Power BI GitHub

- Analyzed Myntra customer and order data to understand customer distribution, sales trends, order patterns, and category-level performance for data-driven business decisions.
- Cleaned and transformed customer and order datasets using Power Query, handled data quality issues, and developed interactive Power BI dashboards with KPI cards, DAX measures, filters, and visualizations.
- Designed dashboard views to track total customers, total orders, sales trends, and top-performing product categories, helping identify customer and category performance patterns.

Amazon Sales and Customer Analytics – E-Commerce GitHub

- Analyzed e-commerce sales, customer behavior, product performance, and inventory to identify revenue drivers, high-value customers, and business growth opportunities.
- Used MySQL joins, CTEs, subqueries, aggregations, GROUP BY, HAVING, and window functions for customer and product analysis, followed by Customer Lifetime Value segmentation and inventory analysis.
- Built Power BI dashboards with KPIs, sales trends, customer segments, and product performance, identifying high-value customer groups, product trends, and inventory opportunities for business planning.

Loan Risk Prediction – Machine Learning GitHub

- Developed a machine learning solution to predict loan default risk and identify potentially high-risk borrowers for data-driven lending decisions.
- Performed data cleaning, EDA, missing-value treatment, categorical encoding, feature engineering, and model training using Python, Pandas, NumPy, and Scikit-learn.
- Evaluated classification models using appropriate performance metrics and analyzed important borrower and loan factors associated with default risk to support early risk assessment.

Education

B.E. – AI and Data Science, SPPU **2025**

Skills

Programming & Tools	Python, SQL, MySQL, Jupyter Notebook, MySQL Workbench, Google BigQuery, Git, GitHub
Data Analysis	Excel, Pandas, NumPy, EDA, Data Cleaning, Data Visualization, Statistical Analysis
Business Intelligence	Power BI, Power Query, DAX, Pivot Tables, Dashboard Development, KPI Analysis
Machine Learning	Supervised Learning, Classification, Regression, Feature Engineering, Model Evaluation, Scikit-learn
AI / GenAI	Large Language Models, Zero-Shot Learning, Prompt Engineering, NLP

Certifications & Achievements

- **Data Analytics Certification – AccioJob** 2026
- **Hackathon – AccioBuild DA Hackathon Participation Certificate** Certificate 2026
- **Published Research Paper – Zero-Shot Learning with LLMs for Financial Queries** 2025
  Published in *Journal of Information Systems Engineering and Management (JISEM)*; explored the application of Zero-Shot Learning with Large Language Models to understand and answer novel financial queries without task-specific training examples. View Publication
